Bachelor's Degree

Universidad De Colima

2019 - 2023

Facultad de Telematica | Internet technology engineering

- Web app developer, Mobile App, Electronic, .

EXPERIENCE

Full Stack Developer

Glicorsa

(Nov 2023 - Current)

I designed, structured, and developed a functional website for the company, collaborating closely with the client to ensure all required functionalities were effectively integrated. Additionally, I led the study for the development of a future e-commerce platform, exploring cutting-edge technologies to enhance user experience and streamline business operations.

Ruby On Rails Developer

BrightCoders

(Dic 2022 - April 2023)

Managed a successful web app project from ideation to completion, overseeing the entire process of designing, developing, and launching the product. Led a team of 5 to collaborate on the project, using agile methodologies like Mob programming and SCRUM to increase productivity and efficiency. Improved both soft and hard skills of team members during the course of the project.

React Native Developer

BrightCoders

(Nov 2021 - March 2022)

Develop native applications with technologies such as JavaScript and React Native, while implementing good practices, test-based development, tools for managing local and remote repositories. In addition to developing fundamental skills in software development such as teamwork and effective communication using an agile methodology.

Front-End Developer React Js

Universidad de Colima

(March 2022 - Ago 2022)

Develop modern and dynamic user interfaces using React JS, while implementing best practices such as test-driven development and utilizing tools for managing local and remote repositories. In addition to honing your skills in software development, you will gain experience in essential teamwork and communication skills using agile methodologies
